

# Playground & School Shade Sails!

## Features

- **Fully Engineered Design**  
All designs are fully engineered to Australian Standards and building codes.
- **Commercial Grade Fabrics**  
Commercial grade shade cloth and architectural PVC's, backed by up to 10 year warranties.
- **High Quality**  
316 grade stainless steel fittings are used throughout for a quality finish and a long life.
- **Posts & Fittings**  
Galvanised posts with optional powder coating with marine grade stainless steel fittings.
- **Professional Membrane Fabrication**  
100 years of fabric experience combined with the latest on CAD, UV stabilised stitching and RF welding.
- **Safety**  
At Brett's we always recommend using round posts and offer optional bumper post covers for child safety.
- **Our Warranty - Your Piece of Mind**  
The Brett's warranty covers building code requirements as a minimum with fabric warranties of up to 10 years.

Australia is known for its extreme weather conditions and high ultraviolet radiation caused by the sun's rays. As Brett's is an Australian owned and operated business, we understand the importance of reducing exposure to the sun's harmful rays by providing high quality shade sails and structure to schools, playgrounds, car parks etc.

Using in house CAD facilities, Brett's will design and install a shade solution, which is fully engineered and aesthetically complimentary to your playground and school.
